Buttons

Buttons should be thought of as the primary action button on the form, e.g. the save or update button. These buttons will automatically take on the colors of the application that you are working in. The default is green.

PRIMARY BUTTON

Primary buttons should be thought of as the primary action button on the form, e.g. the save or update button. These buttons will automatically take on the colors of the application that you are working in. The default is green.

Example:

Save

HTML   LAYOUT BREAKPOINTS   COPY

```
<a class="button button--primary">Save</a>
<a class="button button--primary">Save</a>
```

Best Practices

Warning

There might be some explanatory text as well as a button for navigation here.
